

GUNNER'S PLATFORM INFO

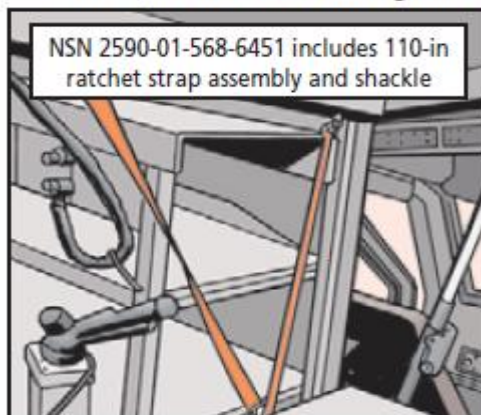

SUPPORT STRAPS
FOR THE GUNNER'S
PLATFORM ARE
KNOWN TO BREAK.

THIS HAPPENS
WHEN THE WRONG
PARTS ARE USED
OR WHEN THE
RIGHT PARTS ARE
INSTALLED THE
WRONG WAY.

Problem is, getting the right parts is a little iffy when you try to find them in the vehicle's technical manual.

So, here's what you need to replace the support ratchet strap (kit), NSN 2590-01-568-6451, which attaches to the gunner's platform:

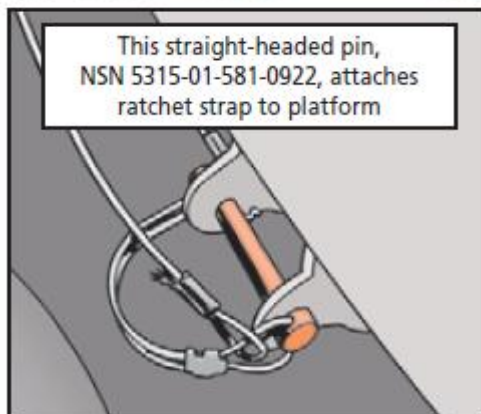

NSN 2590-01-568-6451 includes 110-in
ratchet strap assembly and shackle

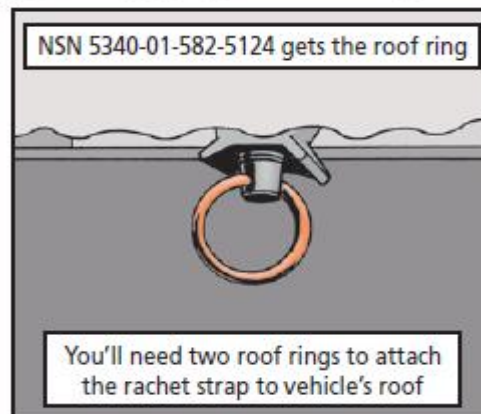

This shackle (D-ring) is also included
with strap kit, NSN 2590-01-568-6451

This straight-headed pin,
NSN 5315-01-581-0922, attaches
ratchet strap to platform

NSN 5340-01-582-5124 gets the roof ring

You'll need two roof rings to attach
the rachet strap to vehicle's roof

By the way, you'll find the installation instructions for these parts starting on Page 4-16-1 of TM 9-2355-106-23-1 (Apr 09).
